## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the claimed process is a process for preparing cyclododecene. However, there is no product, namely cyclododecene, is recited in the body of the claim.

### ***Allowable Subject Matter***

Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 2-32 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not disclose or render obvious a process, as called for in claim 1, in which cyclododecatriene and/or cyclododecadiene in the presence of hydrocarbon is contacted with a catalyst in the gas phase to be converted to cyclododecene in a fixed bed reactor having a Bodenstein number of greater than 100. the closest art Sanchez (5,177,278) discloses a process

of hydrogenation of cyclododecatriene to cyclododecene in the presence of a ruthenium catalyst (see the abstract). However, Sanchez does not disclose using a gas phase and operate the process at a Bodenstein number for the process in the fixed-bed reactor of greater than 100. As shown in the examples in the specification of this application, one having ordinary skill in the art would appreciate what the inventors discover how the Bodenstein number affect the output of the reaction and recognize that this finding is not obvious from the prior art.
